Ryan Kennedy

(908)-838-8567 ryan.kennedy2@gmail.com, www.linkedin.com/in/ryan-kennedy-cs

Objective

To be filled in based on which job I'm applying for.

Education

University of Georgia   August 2018

Bachelor of Science in Computer Science

Experience

Human-Computer Interactions Project | https://www.essentialportfolio.azurewebsites.com

- Worked with a group in an agile environment to design a financial tracking website from top to bottom. The website was built using C# and the .NET framework.
- Primarily did the coding and implementation of the website which used multiple APIs for stock tracking, along with designing the backend classes and models used to facilitate data transfer from database to view.
- Helped with design and documentation from start to finish. The documentation is available at https://loquence.github.io/FABRIK/

Software Development Project | Online Bookstore

- Worked with a group in an agile environment to design an online bookstore built using Java and MySQL as the backend and HTML, CSS, JavaScript, and Freemarker Framework.
- Primarily did the coding of the backend and server-side code, including designing the MySQL database. Also built the model, view, and controller layers on the server side and wrote many of the HTML pages.
- Helped with the design and documentation phase of the project.

Technical Skills

JavaScript, React, JQuery, SQL HTML, CSS, C#, Java, Git
